1. About SMART

The SMART platform automatically identifies eligible beneficiaries using validated data and notify them about available benefits. Citizens are kept informed through multiple channels such as SMS and WhatsApp regarding schemes that are either auto-availed or require their consent before proceeding. For services that require user approval, the platform provides a secure consent mechanism using OTP-based verification. Citizens can provide consent either through the SMART web portal or via an interactive WhatsApp interface, ensuring convenience and accessibility. Once consent is successfully verified, the system automatically processes the request and initiates the delivery of the respective service or benefit.

Through a secure login via the SMART Portal or Rajasthan Single Sign-On (SSO), users can access a personalized dashboard that provides a comprehensive view of their eligible schemes, availed benefits, notifications, and service history. The dashboard allows users to easily review and manage their schemes and services. Overall, the SMART Portal offers a citizen-centric, transparent, and efficient approach to public service delivery, ensuring that government benefits are accessible, timely, and delivered with greater accuracy and accountability.

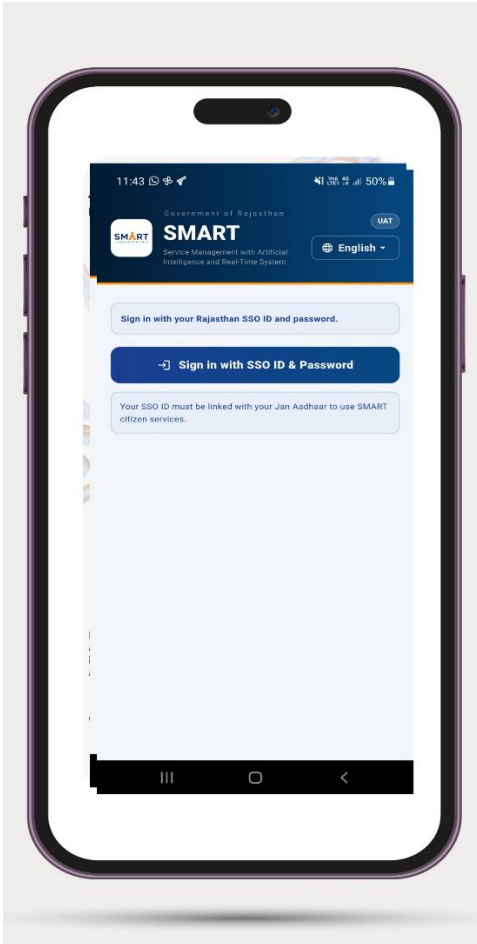

2. Download and Install the SMART Rajasthan Mobile Application

To download and install the SMART Rajasthan Mobile Application from the **Google Play Store**, follow the steps below:

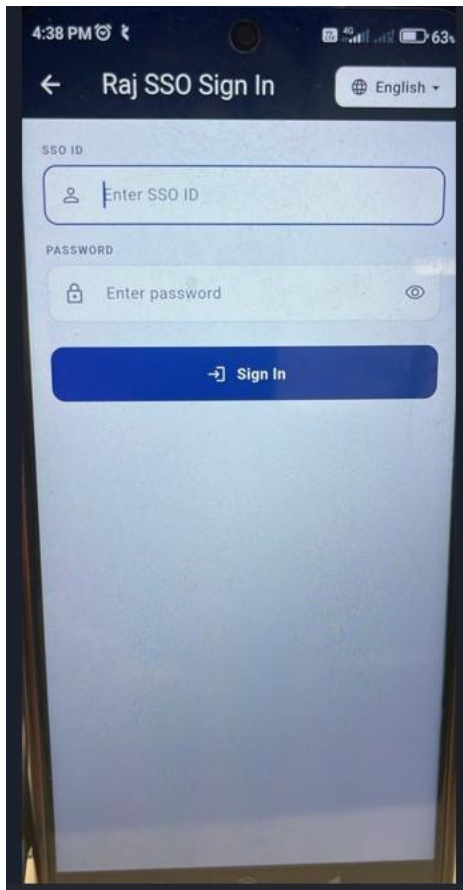

1. Open the **Google Play Store** on your Android device.
2. In the search bar, type **SMART** (or the exact application name).
3. Select the **SMART Mobile Application** from the search results.
4. Tap **Install** to download and install the application.
5. Once the installation is complete, tap **Open** to launch the application.

3. Login to Mobile Application

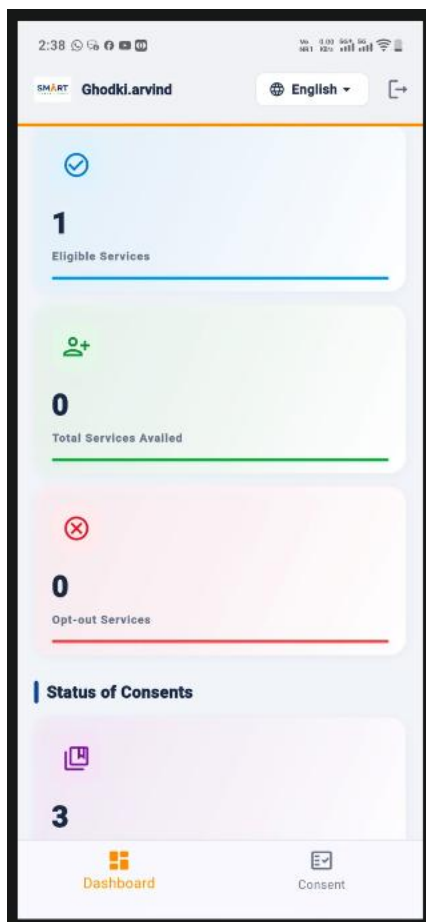

After downloading and installing the application on their smartphones, the User needs to click on the SMART App and below login screen will be visible.

Step 1: The User needs to enter the **Rajasthan Single Sign-On (SSO)** credentials : SSO ID and Password. The login credentials will be same as SMART application.

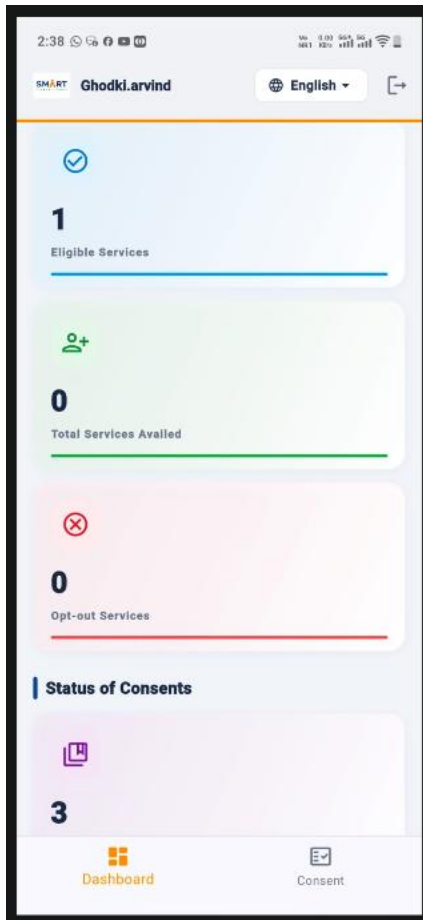

Step 2: After successful login, the user is redirected to the SMART Mobile Application Home screen.

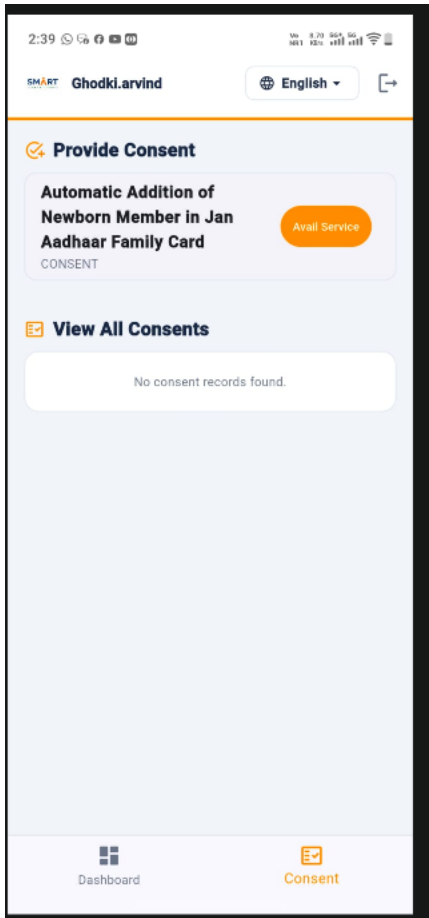

4. Citizen Dashboard

Citizen Dashboard shows key information about Status of services and consent.
As shown in the picture below

4.1 Give Consent for Availing Benefits of Services & Schemes

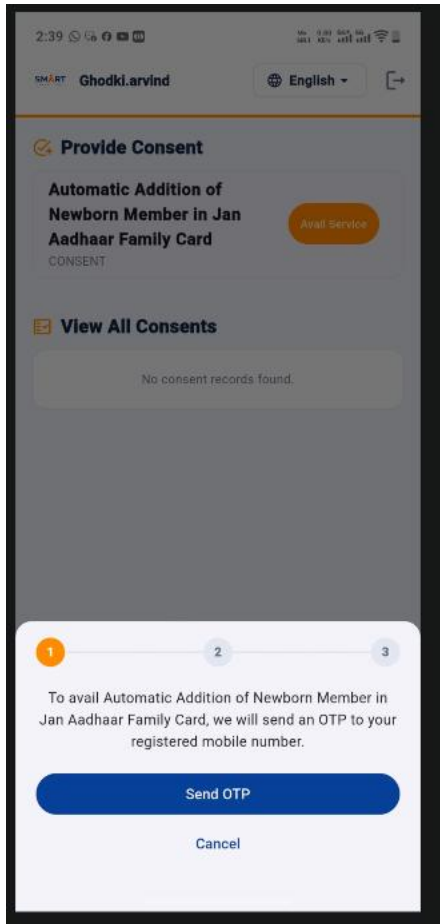

Step 1: Navigate to the Consent tab from the Citizen panel, and then select the desired service under the Provide Consent section.

**Step 2: Initiate Consent**

User selects “Provide Consent”.

Step 3: Request OTP

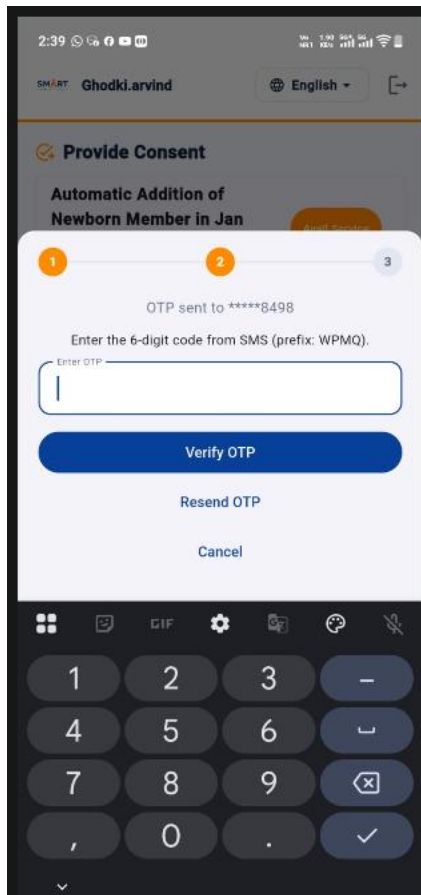

User selects the option to request OTP to avail the scheme or service.

**Step 4: Receive OTP**

User will get OTP in registered mobile.

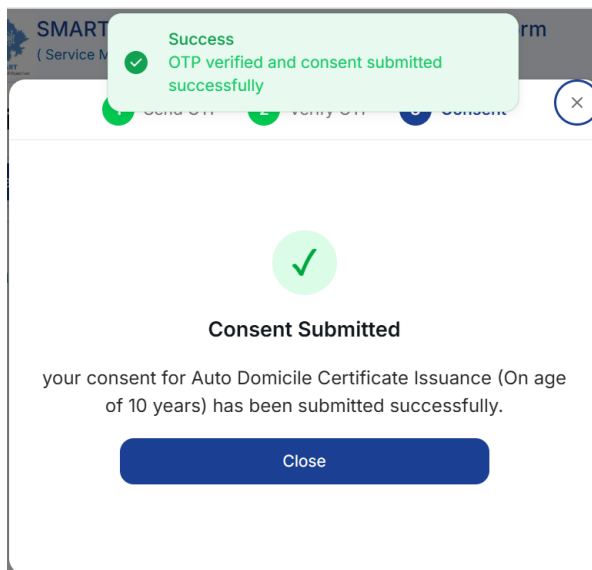

Step 5: Submit OTP

User enters and submits the received OTP in the application.

Step 6: Confirmation

User receives confirmation that consent has been successfully recorded upon OTP validation.
